

Production Staff Tips Distribution

Developer Documentation (Standalone Module)

This module governs how the **4% production allocation** is accumulated, distributed, deducted, and paid to **production staff**.

This logic is **separate from front-of-house staff tips**.

1. Production Tips Source (Daily)

Origin

- Each location generates **4% of gross tips per shift (AM / PM)**
- These amounts are already calculated daily

Daily Production Pool

For each **date (across all locations)**:

DAILY_PRODUCTION_POOL =
Σ (4% shift deductions from all locations and shifts)

This is a **global daily pool**, not location-specific.

2. Eligible Production Staff

Production staff are **explicitly defined**, not derived from roles.

Initial configuration:

Name	Allocation %	Subject to Tardiness
Marina	1.0%	Yes
Laura	1.5%	No (Senior Leader)
Bruna	1.0%	Yes

Allocation percentages are **fixed configuration values** and must be editable by admin.

3. Daily Production Tip Allocation

Each production staff member receives a **fixed percentage of the daily production pool**.

Formula (Daily)

$$\text{EMPLOYEE_DAILY_PRODUCTION_TIPS} = \text{DAILY_PRODUCTION_POOL} \times \text{EMPLOYEE_ALLOCATION_PERCENT}$$

This calculation happens **daily**, but **no payout occurs daily**.

4. Weekly Aggregation (Production Staff)

Production tips follow the **same payout cadence** as front staff.

For each **production staff member, per week (Mon–Sun)**:

$$\text{WEEKLY_GROSS_PRODUCTION_TIPS} = \sum \text{EMPLOYEE_DAILY_PRODUCTION_TIPS}$$

This value is:

- System-generated
 - Not editable
 - Basis for deductions
-

5. Weekly Tardiness Input (Production Staff)

For production staff subject to tardiness:

$$\text{WEEKLY_TOTAL_TARDINESS_MINUTES}$$

This is pulled from the **same tardiness module** used for front staff.

6. Tardiness Deduction Rules (Same as Front Staff)

Deduction Table

Weekly Tardiness Minutes	Deduction %
0 – 5 minutes	0%
> 5 – 10 minutes	15%
> 10 minutes	20%

Applicability

- **Laura** → exempt (always 0%)
 - **Marina & Bruna** → rules apply
-

7. Production Tardiness Deduction Calculation

For applicable staff:

$TARDINESS_DEDUCTION_AMOUNT = WEEKLY_GROSS_PRODUCTION_TIPS \times deduction_percent$

$WEEKLY_AFTER_TARDINESS = WEEKLY_GROSS_PRODUCTION_TIPS - TARDINESS_DEDUCTION_AMOUNT$

8. Manual Deduction Layer (Production Staff)

Manual deductions apply **after tardiness**, same structure as front staff.

Rules:

- Fixed amount
- Cannot exceed remaining balance
- Reason required

$NET_WEEKLY_PRODUCTION_TIPS = \max(0, WEEKLY_AFTER_TARDINESS - MANUAL_DEDUCTION_AMOUNT)$

9. Production Tardiness Redistribution Logic

Redistribution Pool

For each **week (global, production-only)**:

$$\text{PRODUCTION_REDISTRIBUTION_POOL} = \sum \text{TARDINESS_DEDUCTION_AMOUNT}$$

Eligibility

Eligible to receive redistributed production tips if:

- Weekly tardiness ≤ 5 minutes **or exempt**
- Weekly gross production tips > 0

Staff who incurred a tardiness deduction:

- **Do not receive redistribution**
-

Redistribution Basis

Redistribution is **percentage-based**, not hours-based.

$$\text{ELIGIBLE_TOTAL_PERCENT} = \sum \text{ALLOCATION_PERCENT (eligible staff)}$$

Redistribution Formula

$$\begin{aligned} \text{EMPLOYEE_REDISTRIBUTED_PRODUCTION_TIPS} = & \\ & (\text{ALLOCATION_PERCENT} \div \text{ELIGIBLE_TOTAL_PERCENT}) \\ & \times \text{PRODUCTION_REDISTRIBUTION_POOL} \end{aligned}$$

10. Final Weekly Production Payout

$$\begin{aligned} \text{FINAL_WEEKLY_PRODUCTION_TIPS} = & \\ & \text{NET_WEEKLY_PRODUCTION_TIPS} \\ & + \text{EMPLOYEE_REDISTRIBUTED_PRODUCTION_TIPS} \end{aligned}$$

11. Weekly Production Payout Table (Required UI)

Field	Description
Employee	Name
Allocation %	Fixed %
Gross Production Tips	Weekly sum
Weekly Tardiness (min)	From module
Tardiness %	Applied
Tardiness Deduction	System-calculated
Manual Deduction	Admin input
Redistribution Received	From others
Final Weekly Production Payout	Final amount

12. Processing Order (Production Module)

1. Daily production pool aggregation
 2. Daily percentage allocation
 3. Weekly aggregation
 4. Tardiness deduction
 5. Manual deduction
 6. Redistribution pool creation
 7. Redistribution to eligible staff
 8. Final weekly production payout
-

13. Guardrails (Non-Negotiable)

- Production tips **never mix** with front staff tips
 - Redistribution is **closed-loop** (nothing disappears)
 - Senior exemption must be explicit, not inferred
 - Percentages must sum logically (not required to equal 100%)
-

Final Lock Statement (For Developer)

This is a **percentage-based incentive pool**, not an hours-based system.

- Front staff = hours-driven
- Production staff = allocation-driven
- Tardiness enforces accountability **without shrinking the pool**

Any shortcut or merge between systems breaks trust.
